

Dr. LaTeX Beamer

How I Learned to Stop Worrying and Love the Slide

Konqi Konqueror

user@domain.tld

Outline

Prerequisites & Goals

Knowledge is a brick wall that you raise line by line forever

- Obviously some basic LaTeX knowledge is necessary
- Some more features will be provided here
- You'll learn them by looking at this presentation source
- Learn how to make well structured slides
- Using a beautiful theme (congrats to the Oxygen team!)
- Take over the world
- Relax...

Prerequisites & Goals

Knowledge is a brick wall that you raise line by line forever

- Obviously some basic LaTeX knowledge is necessary
- Some more features will be provided here
- You'll learn them by looking at this presentation source
- Learn how to make well structured slides
- Using a beautiful theme (congrats to the Oxygen team!)
- Take over the world
- Relax...

Sections, Frames and Blocks

Put everything into boxes

The current section is "Basic structuring". And the current frame is what you have on the screen right now.

A beautiful block

A block has a title, and some content. You can put in a block almost everything you want that is provided by LaTeX. For example math works as usual:

$$\sum_{i=1}^n i = \frac{n \times (n+1)}{2} \quad (1)$$

Also works outside a block:

$$\sum_{i=1}^n i^2 = \frac{n \times (n+1) \times (2n+1)}{6} \quad (2)$$

$$\sum_{i=1}^n i = \frac{n \times (n+1)}{2} \quad (1)$$

$$\sum_{i=1}^n i^2 = \frac{n \times (n+1) \times (2n+1)}{6} \quad (2)$$

Different type of blocks

Weeeee! Colors!!

Standard block

- A standard block, used for grouping
- Obviously can contain itemizes too...
 - And nested itemizes...
 - of course!

Alert block

WARNING: Something very important inside this block!

Example

Note that examples are displayed as a special block...

Highlighting

Hey! Look here! here!

A regular block

- Normal text
- **Highlighted text** to draw attention
- **"Alert'ed" text** to spot very important information
- Alternatively you can
 - **"Alert"** the item itself

If it's very very important...

... you can "alert" in an "alertblock"

Ewww, nasty, heh?

A regular block

■ Normal text

- "AlertCod" song

- Alternatively you can use the `add` method:

- "Alert" the

If it's very very impo

... you can "alert" in
Fusion native lib?

Overlay effects

Keep the suspense!

Time bomb

- Two more to go
- One more to go
- Last chance...
- BOOM!

Contributing to this beamer style

We want you !

Why?

- Beamer is hot!
- This style deserves to be improved

How?

- Grab it
- Improve its LaTeX code
- Use you artistic skills
- Document it
- Help other people to use it
- Use it...
